- Basics of usage API
  Technologies: Python, BotFather, Weather forecast API,Git

Experience

MTS Group
(Sep 2021 - Dec 2021)

- It was a great opportunity to broaden my mind about telecommunications work and high technologies can make a life for ordinary people better.

- During this Internship, I did analyse data of cell towers for the mobile networks and had to cluster all information chunks and analyse the capacity of regional towers.
- And this work helped the company to realise how to increase network bandwidth with minimal investment and improve the average velocity of mobile internet.

Languages

Russian: Native
English: B2 (fluent)

Awards

Luxoft Training

Python Certificate

Summary

- Skilled team player with a strong background in Data environments. Works well independently to handle assignments and is always ready to go beyond basics assignments. Quick learner with good computer abilities.

- Hardworking and reliable python coder focused on going above and beyond to support team and serve customers. Trained in Telegram-Bot development and offering top-notch development abilities. Motivated to continue to learn and grow as Python Backend professional.
